Label the parts of the plant and read about what each part can do!

1. This part of the plant is typically very colourful and is what helps attract pollinators to the plant!

2. This part of the plant takes in sunlight and carbon dioxide and transforms it into food for the plant!

3. This part of the plant is underground! This part helps anchor the plant in the ground so it doesn’t fall over and helps the plant take in water and nutrients from the soil.

4. This part of the plant helps it stand up straight and tall. It also helps move food and water to all the other plant parts.

5. This part of the plant are hard, little cases with baby plants inside them.
1. Flower
2. Seed
3. Roots
4. Stem
5. Leaf
