

Parts of the Seed

Farmers grow not only the food we eat, but also some of the food that animals eat. Most of the food farmers grow starts out as a little **seed**. That seed is planted in the ground to become yummy fruits and vegetables.

Colour and label the parts of the seed. Use the word bank to help. Don't forget to read about what each part can do!

Word Bank:

Embryo Seed Coat Endosperm

Answers: 1: Seed coat 2: Embryo 3: Endosperm
